

Report 7

Gregor Robertson

24 Nov 2016

Progress This Week

This week I have made progress in making the pass run on an example program using integers. The pass is now able to loop over the instructions of a function, relate annotations to variables and mark variables as equivalent (i.e. if x is equivalent to y , then x and y share an annotation).

Aims For Next Week

By the end of next week I hope to:

- Clean up the code, to make use of better C++ coding conventions **Easy**
- Test the code using more example programs (for example ones using for loops) **Medium**
- Set goals for work over the Christmas period **Easy**

Questions

I have no questions at the time of writing this report. I will get in contact with you if I have any.
