

Report 6

Gregor Robertson

17 Nov 2016

Progress This Week

This week I set up my dissertation on ShareLaTeX and started to write the introduction and background for the project. I re-read the papers that I was sent, as well as look at some other papers which gave some background to heterogeneous computing which I think would be a worth while inclusion in the introduction of my dissertation.

Aims For Next Week

Next week I plan on splitting my time between coding and research. So far I have the basics of the pass working. By the end of next week I hope to:

- Examin an example program which this pass could be used on **Easy**
- Get the pass working for integer types **Hard**

Questions

I have no questions at the time of writing this report. I will get in contact with you if I have any.
